Monthly Retail Trade

Sales and Inventories

June 1996

BR/96-6
Issued August 1996

Sales. Total sales for all retail stores in the United States during June 1996 were an estimated \$204.5 billion. These estimates were adjusted for seasonal variations, holiday, and trading-day differences, but not for price changes. The month-to-month percentage change from May 1996 sales was an estimated -0.5 (± 0.3) percent, while the year-to-year change from June 1995 was an estimated +4.3 (± 0.7) percent.

Excluding the automotive group, the June sales were -0.2 (± 0.3) percent when compared to the May 1996 sales, while the change from June 1995 was +4.2 (± 0.5) percent.

The year-to-year changes for the major kinds of business ranged from the building materials group stores, which were +11.8 (± 3.3) percent, to the eating and drinking group stores, which were +1.6 (± 2.3) percent.

The year-to-year change for sales in the Mountain Division was +8.6 (± 3.4) percent, while the change in sales for the West North Central Division was -2.4 (± 2.7) percent.

Inventories. After adjustment for seasonal variations but not for price changes, total retail inventories in stores and warehouses servicing retail establishments were an estimated \$304.6 billion at the end of June. The month-to-month percentage change from May inventories was an estimated +0.2 (± 0.3) percent and was an estimated +1.4 (± 0.7) percent above June 1995.

For durable goods stores the percentage change from May was +0.5 (± 0.7) percent, while the change from June 1995 was +2.5 (± 1.5) percent. For nondurable goods stores, the month-to-month change from May was -0.1 (± 0.3) percent, while the year-to-year change from June 1995 was +0.2 (± 0.5) percent.

The total inventories/sales ratio for June based on seasonally adjusted data was 1.49, down .04 from June a year ago.

^PPreliminary estimates.¹Includes data for leased departments operated within department stores. Data for this line not included in broader kind-of-business totals.²Includes establishments primarily selling merchandise through coin-operated vending machines, by house-to-house canvass or from mail order.³The sales estimates for "total mail order", SIC 5961, are the sums of the "mail-order houses (department store merchandise)" and the "other mail-order," formerly published in the *Monthly Retail Trade Report*.⁴GAF represents stores which specialize in department store types of merchandise (general merchandise, apparel, furniture, and miscellaneous shopping goods stores). (See appendix A.)⁵Data are adjusted for seasonal variations, holiday, and trading-day differences, but not for price changes. Each month, new factors are developed using the latest estimates and applied to the unadjusted Advance (the month after the Preliminary estimate, but not available in this publication), Preliminary, and Final (the month before the Preliminary estimate) estimates and to the estimates of the previous year that correspond to the Advance and Preliminary months. (See appendix C.)

Note: U.S. and group totals include data for kinds of business not shown. Measures of sampling variability are shown in table B-1.

¹Data are adjusted for seasonal variations, holiday, and trading-day differences, but not price changes. Each month, new factors are developed using the latest estimates and applied to the unadjusted Advance (the month after the Preliminary estimate, but not available in this publication), Preliminary, and Final (the month before the Preliminary estimate) estimates and to the estimates of the previous year that correspond to the Advance and Preliminary months. (See appendix C.)

²Includes data for leased departments operated within department stores. Data for this line not included in broader kind-of-business totals.

³The sales estimates for "total mail order", SIC 5961, are the sums of the "mail order houses (department store merchandise)" and the "other mail-order," formerly published in the Monthly Retail Trade Report.

⁴GAF represents stores which specialize in department store types of merchandise. (See appendix A.)

Note: Totals include data for kinds of business not shown.

^PPreliminary estimates.¹Includes data for leased departments operated within department stores. Data for this line not included in broader kind-of-business totals.²Data are adjusted for seasonal variations, holiday, and trading-day differences. Each month, new factors are developed using the latest estimates and applied to the unadjusted Preliminary and Final (the month before the Preliminary estimate) estimates and to the estimates of the previous year that correspond to the Preliminary month. (See appendix C.)

Note: The Group II component of the sample consists of companies which had 11 or more retail establishments according to the most recent update of multiestablishment files which were selected with certainty (i.e., their sales size exceeded specified dollar volume cutoffs which varied by kinds of business). Group totals include kind of business not shown.

^PPreliminary estimates.

¹For definitions, see appendix D.

²Includes data for leased departments operated within department stores. Data for this line not included in broader kind-of-business totals.

³GAF represents stores which specialize in department store types of merchandise. (See appendix A.)

Note: Totals include data for kinds of business not shown. Measures of sampling variability are shown in table B-5.

Appendix A.

Explanatory Material

INTRODUCTION

The Monthly Retail Trade report is produced by the Bureau of the Census to provide (1) estimates of sales of retail stores by kind of business for the United States and geographic areas—regions, divisions, selected States, metropolitan areas, and cities (2) national estimates of end-of-month inventories of retail establishments by kind of business. The retail sales and inventories estimates in this report are developed from samples representing all sizes of firms and kinds of business in retail trade throughout the nation. The samples have been designed so that estimates can be evaluated in terms of their sampling variability. Effective with the August 1993 report, a benchmarking operation, described below, accounted for the sales and inventories estimates for the new employers and nonemployers formerly represented by an area sample.

DESCRIPTION OF SALES AND INVENTORIES SAMPLES

Sales Sample

Monthly retail sales estimates are based on a probability sample selected from the retail employers (Standard Industrial Classification (SIC) 52-59) contained in the Census Bureau's Standard Statistical Establishment List (SSEL). The SSEL includes employers who make social security payments for their employees under the Federal Insurance Contributions Act (FICA).

The list sample originally was drawn from the SSEL as updated to December 31, 1989. The initial SSEL consisted of two lists. The first list was made up of all employer identification (EI) numbers (assigned in connection with FICA) with reported payroll in at least one quarter of 1989. The second list consisted of all establishments of known multiestablishment companies as of December 31, 1989. These lists contained information on sales/receipts, payroll, employment, name and address, kind-of-business classification, etc. Before the sampling frame was available, a study was made of the universe of retail businesses using files from the 1987 Census of Retail Trade. This study determined the stratification of the sampling units based on 1987 sales and kind of business, and also determined the optimal allocation of the sample necessary to meet specified sampling variability objectives for sales

estimates for different kind-of-business groups. The primary stratum boundary determined in the study was the certainty cutoff to be used for each kind of business. The cutoff, which ranged from annual sales of \$2.5 million to annual sales of \$100 million, was particularly important since it also determined the type of sampling unit.

Sampling units for the list sample consisted of both companies and EI's. For an EI to be eligible for the initial list sample, the EI had to be active, (i.e., had payroll in 1989 and was on the latest available Internal Revenue Service (IRS) mailing list for FICA taxpayers). If a known company had total retail sales (on a 1987 basis) above the cutoff for its major kind of business, the company was selected for the sample with certainty (i.e., probability = 1.0). The company, which might consist of two or more EI's, was then the sampling unit; therefore, any new retail establishments that the company might acquire, even if under new or different EI's, were in the sample with certainty. Single-establishment companies, whether or not selected with certainty, were considered as EI sampling units.

All retail companies not selected with certainty were treated on an EI basis; that is, the EI was the sampling unit. The EI's were stratified according to their major kind of business and their estimated sales (on a 1987 basis). Within each stratum, a simple random sample of EI's was selected. The sampling rates for these EI's varied between 1 in 3 and 1 in 1,000.

For all EI 'births' after the initial selection, a two-phase selection procedure was used. EI births are new EI numbers recently assigned by the Internal Revenue Service (IRS), with a kind-of-business classification assigned by the Social Security Administration (SSA), and currently on the IRS mailing list for FICA taxpayers. In the first phase, births were stratified by kind of business and size (expected employment or quarterly payroll). A relatively large sample was drawn and canvassed for a more reliable measure of size (sales/receipts in 2 recent months) and a more detailed kind-of-business code, if needed.

Using this more reliable information, the births selected in the first phase were subjected to probability-proportional-to-size sampling with overall probabilities equivalent to those used in drawing the initial sample from the 1989 SSEL. Because of the lag in reporting births to the IRS and the SSA and the time needed to accomplish the two-phase birth-selection procedure carried out quarterly, births were actually added to the list sample approximately 9 months after they began operation. During this 9 month period, the reports from the existing list sample retailers accounted for

the period-to-period changes, while benchmarking adjusted the levels to be consistent with the prior annual survey.

To be eligible for list sample canvass and tabulation in a given month, a retail noncertainty business must meet both of the following requirements:

1. It must be on the latest available IRS mailing list for the FICA taxpayers.
2. It must have been selected from either the SSEL or the file of employer births. For this purpose, a universe file of all retail businesses ever given a chance for selection is maintained. This file shows, among other things, which EI numbers actually have been selected.

For businesses selected into the sample with certainty, the first requirement is changed. These certainty sampling units are not dropped from canvass and tabulation if they are no longer on the IRS mailing list. Rather, these businesses are contacted, and if there are successor businesses, they are added to the survey. This is a tighter form of control used for these larger businesses.

The list sample is updated quarterly to account for business births and deaths and represents approximately 96 percent of retail sales. Canvass of this component is primarily by mail. Recent EI births and nonemployers, not accounted for by the list sample, represent the balance of retail sales. The benchmarking procedure adds this component to the list sample estimates to yield the total retail estimates.

Inventory Sample

The list sample portion of the inventory sample is a subsample of the EI's and companies included in the monthly retail sales survey. Benchmarking also accounted for the inventories of recent EI births and nonemployers.

Studies similar to those performed for the sales sample were conducted prior to selecting the inventory sample. Those studies determined the stratification (based on sales from the 1987 Census of Retail Trade), allocation (based on inventory from the 1987 Annual Retail Trade Survey), and certainty cutoffs required to meet desired inventory sampling variability constraints for various kind-of-business groups.

The initial inventory list sample was selected from the initial sales list sample by first stratifying EI's and companies by kind-of-business groups and estimated sales (on a 1987 basis). To meet reliability constraints, the required number of cases in each size stratum were then selected on a probability-proportional-to-size basis. Some companies and EI's because of their relatively large impact on the inventory estimates, were selected with certainty in order to reduce the sampling variability associated with the estimates.

After the initial inventory sample selection, all births selected into the sales sample were subjected to probability-proportional-to-size sampling with overall probabilities equivalent to those used in drawing the initial inventory sample.

BENCHMARKING

Retail sales in this report reflect the results of a benchmarking operation that developed revised monthly sales estimates for the period January 1987 through December 1992. The benchmarking process equated the 12-month sum of the estimates for each of the years 1987 through 1991 to the annual sales estimate derived from the 1987 census of Retail Trade and the Annual Retail Trade Surveys. The benchmarking process also minimized the differences between the month-to-month trends of the estimates from the original and the revised series. We derived the original series estimates by using the composite estimation procedures described below under *estimation procedures*.

We revised the end-of-month inventory estimates for the period January 1988 through December 1992. The benchmarking process equated the 1988 through 1991 December estimates to the end-of-year inventory estimates derived from the Annual Retail Trade Surveys. The process also minimized changes to the month-to-month trends of the original inventory series. We derived the original inventory estimates using the composite estimation procedures.

We derived carry-forward factors for sales and inventories by dividing the revised December 1991 estimates by the original composite estimates for December 1991. Through the use of these carry-forward factors, the effects of the revision process were applied to composite sales and inventory estimates subsequent to December 1991. These factors were derived at the most detailed kind-of-business levels. Aggregate level estimates were derived by summing appropriate detail level estimates, thereby assuring additivity.

For Group II sales estimates, ratios of the revised to previous published sales estimates for all stores in each kind of business were developed for the period January 1987 through December 1991. All benchmarked estimates subsequent to December 1991 were derived by multiplying the composite Group II estimates by carry-forward factors.

For geographic areas, ratios of the revised-to-original composite sales estimates for all stores in each kind of business were developed for each month subsequent to January 1987. These ratios were multiplied by the composite geographic area sales estimates to derive benchmarked levels of sales for those series.

Starting with the July 1993 final and August 1993 preliminary estimates, the carry-forward factors were adjusted to include a component representing EI birth employers and nonemployers. This adjustment was approximately 4 percent of the total retail sales estimate, although it varies by kind of business.

Relationship of Group I and II Components of Sample

The Group II component consists of companies that had 11 or more retail establishments as of December 31, 1989, and qualified for certainty selection. To qualify for certainty, total annual sales of these companies (on a 1989 basis) had to exceed specified dollar volume cutoffs, that varied by kind of business. The certainty cutoff ranged from annual sales of \$2.5 million to annual sales of \$100 million. The Group I component consists of all other retail establishments.

Although separate tabulations are made for the Group I and Group II components of the list sample, only the data developed for the Group II component are published separately (table 3). Group I estimates are included in the "retail trade" figures shown in this report.

ESTIMATION PROCEDURES

Rotating sample panels are used for the sales and inventory samples (except for very large retail businesses which are selected with certainty and canvassed each month). For sampling units in the rotating panels, 2 months of data are obtained at each enumeration. For example, February list sample rotating panel cases report data for February (the current month) and January (the previous month). In the following month, different rotating panels (the March panels) report figures for March and February. Three list sample panels are used. This permits the use of a composite estimation procedure that provides estimates more reliable than those that would be obtained from a completely fixed sample of about twice the size and also reduces the reporting burden for selected businesses.

The first estimate issued each month, based on the full sample, is called the preliminary estimate. The preliminary composite estimate for the current month at each three-digit SIC level for sales and at each major kind-of-business grouping for inventory is a weighted average of two estimates: (1) the current month unbiased estimate (weight 0.25) and (2) a ratio estimate (weight 0.75) obtained by multiplying the current-to-previous month ratios developed from the current month report forms by the preliminary composite estimate for the previous month.

A final estimate is developed 1 month later using information available from the following month's enumeration. The final composite estimate for individual kind-of-business levels is also a weighted average of two estimates - the preliminary composite estimate for a given month (weight 0.8) and the unbiased estimate (weight 0.2) for the same month as obtained from the next month's reporting panel. The aggregate level estimates are obtained by adding the individual kind-of-business components.

The preliminary composite estimates provide a measure of the dollar volume level that is considerably more reliable than the unbiased estimates, and the final composite

estimates are generally more reliable than the preliminary composite estimates. The most reliable indication of month-to-month trend is the ratio of the current month's preliminary composite estimate divided by the previous month's final composite estimate. This is true because the numerator and denominator of this ratio are more highly correlated than would be the case if the numerator and denominator were two preliminary or two final estimates. The preliminary-final ratio, therefore, has less sampling variability than one based on two preliminary or two final estimates.

Another advantage gained by using the rotating panel system is that the very large non-certainty cases in each enumeration are identified and recanvassed in the following month or months. This makes it possible to reduce their weights without biasing the results and thus lessen their influence on the estimates. This increases the reliability of the estimates, particularly the measure of month-to-month change.

Percent Change

Month-to-month and year-to-year comparisons for sales and inventory shown in this report are based on the total dollar volume of receipts or value of inventory for each of the periods being compared. These trends thus include the effect of stores starting operation or ceasing operation and are not limited to "identical stores," i.e., those in operation in both of the periods being compared.

The percent changes shown in table 2 for sales for kinds of business not marked with an asterisk are derived directly from the dollar volume estimates in table 1. The sampling variability of dollar estimates for those kinds of business with an asterisk is relatively large. Therefore, such estimates are not published in table 1 for sales. However, the sampling variability of the percent changes derived from such estimates are relatively small and are, therefore, published in table 2 for sales.

Unpublished Data

Selected additional data, such as dollar volume estimates for some kinds of business not separately shown in this report, are produced as a byproduct of the regularly published statistics. These additional data have not been included in this publication because of high imputation or sampling variability (relative to the changes from month to month or between other periods), so as to make them potentially misleading. For a fee, the Bureau of the Census will release such figures for individual use, though not for publication. Selected additional data providing greater detail by geographic area and by kind of business are also available for a fee. It should be noted that some unpublished figures can be derived directly from this report by subtracting published data from their respective totals. However, the figures obtained by such subtraction would be subject to the high imputation rates or high sampling variability described previously for unpublished kinds of business.

DEFINITION OF TERMS

Sales. Sales include the following: merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; and receipts from gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed along to the retailer. Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances and manufacturers' rebates are not deducted from total sales, however, rebates offered by the retailer are deducted. Total sales do not include commissions from vending machine operators or nonoperating income from such sources as investments and rental or sales of real estate.

Sales exclude sales and excise taxes collected directly from customers and paid directly to a local, State, or Federal tax agency. Also excluded are receipts from customers for carrying or other credit charges.

The sales figures represent total sales and receipts of all establishments primarily engaged in retail trade. They do not include sales at retail by manufacturers, wholesalers, service establishments, and others whose primary activity is other than retail trade.

Inventories. Inventories represent stocks of merchandise, valued at cost, on hand for sale by retail establishments at the end of the month. Methods of valuation may vary according to the accounting practices of the firms. However, the estimates provided are on a non-LIFO basis. Inventories are shown for retail stores and warehouses combined. Only those warehouses which maintain supplies of merchandise primarily intended for distribution to retail stores within the organization are included. Inventories exclude the value of fixtures, furnishings, equipment, and supplies used in store and warehouse operations and not held for resale.

Inventories-Sales Ratios. The inventories-sales ratios indicate the relationship of end-of-month inventories to sales during the month. The ratios shown are derived by dividing the inventories estimates by the corresponding sales estimates. No adjustment is made in these ratios for the markup in sales which may vary from one kind of business to another.

Kind-of-Business Classifications. Retail trade, defined as major groups 52 through 59 of the SIC Manual, includes establishments engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. Exceptions to this general rule are made necessary by trade practices. For example, lumber yards and paint, glass, and wallpaper stores are included in retail trade if they sell to the general public, even if a higher proportion of their sales is made to contractors. Also, establishments engaged in selling products such as typewriters, stationery, or gasoline to the general public are classified in retail trade, even though such products may not be used for personal or household consumption. However, even within these areas of exception to the general rule, establishments that sell exclusively to business establishments, institutional and industrial users, or contractors are classified in wholesale trade.

Additional characteristics of retail trade establishments are that they usually operate at fixed places of business; they are engaged in activities to attract the general public to buy; they buy or receive merchandise as well as sell; they may process their products, but such processing is incidental or subordinate to selling; and they are considered as retail in the trade. Not all of these characteristics need be present, and some are modified by trade practice.

Kind-of-business classifications are not interchangeable with commodity classifications. Most businesses sell several kinds of commodities. The kind-of-business code assigned generally reflects the individual commodity, the commodity group which is the primary source of the establishment's receipts, or some mixture of commodities which characterizes the establishment's business. Classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the food group classification excludes stores selling food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as food stores, some of their receipts may be derived from the sales of nonfood products.

GAF. GAF includes the following: General merchandise group stores (SIC 53); apparel and accessory stores (SIC 56); furniture, home furnishings, and equipment stores (SIC 57); and miscellaneous shopping goods stores (SIC 594). GAF represents stores which specialize in department store types of merchandise.

A description of each kind of business included in the accompanying statistical data is shown in appendix E.

Appendix B.

Reliability of Data

An estimate based on a sample survey will differ from the population value because of sampling variability and nonsampling error. Sampling variability occurs because observations are made only on a sample, not on the entire population. Nonsampling errors can be attributed to many sources in the reporting, collection and processing of data. The accuracy of a survey result is determined by the joint effects of sampling variability and nonsampling errors.

Measures of Sampling Variability

The particular sample used in these surveys is one of a large number of all possible samples of the same size that could have been selected using the same design. Estimates derived from the different samples would differ from each other. The average of these estimates would be close to the estimate derived from a complete enumeration of the population. This assumes that a complete enumeration has the same nonsampling error as the sample survey. For sales and inventories, the average of the estimates differs from a complete census because of the composite estimation technique. Disregarding this difference, the standard error of the estimate is a measure of the variability among the estimates from all possible samples of the same size and design and, thus is a measure of the precision with which an estimate from a particular sample approximates the results of a complete enumeration.

The coefficient of variation (expressed as a percent) is the standard error of the estimate times 100 divided by the value being estimated. Note that the coefficients of variation are estimates derived from the sample and are also subject to sampling variability. Tables B-1 through B-4 give the estimates of coefficients of variation in percent for recent monthly dollar-volume sales and inventory estimates prepared by the Bureau of the Census and shown in this report.

The coefficients of variation presented in the tables permit certain confidence statements about the sample estimates. As noted before, the particular sample used in this survey is one of a large number of samples of the same size that could have been selected using the same design. In about 2 out of 3 (67 percent) of these samples, the estimate would differ from a complete enumeration by less than the corresponding percent for that estimate shown in the sampling variability tables. In about 9 out of 10 (90 percent) of these samples, the estimates would differ from the results of a complete enumeration by less than 1.65 times the percentage shown. In about 19 out of 20 (95

percent) of these samples, the estimates would differ from the results of a complete enumeration by less than twice the percentage shown.

To illustrate the computations involved in the above confidence statements, as related to dollar volume sales estimates, assume that an estimate of sales published in table 1 is \$10,750 million for a particular month and that the median coefficient of variation for this estimate, as given in table B-1, is 1.8 percent, or 0.018. Multiplying \$10,750 million by 0.018 yields 194 million. Therefore, a 67-percent confidence interval is \$10,556 million to \$10,944 million (\$10,750 million plus or minus \$194 million). If corresponding confidence intervals were constructed for all possible samples of the same size and design, approximately 2 out of 3 (67 percent) of these intervals would contain the figure obtained from a complete enumeration. Typical practice is to construct 90- or 95-percent confidence intervals. Continuing with the illustration, a 90-percent confidence interval using $1.65 \times 0.018 \times 10,750$ million to yield 320 million). A 95-percent confidence interval is \$10,362 million to \$11,138 million (\$10,750 million plus or minus \$388 million).

All comparisons appearing on the front page of this publication and for which measures of sampling variability are available are accompanied by an indication of the 90-percent confidence interval. Thus, a statement such as "+.8 (+ or -1.3)" indicates a 90-percent confidence interval from -0.5 to +2.1. If the confidence interval contains zero, it is uncertain whether there is an increase or decrease.

Nonsampling Errors

As calculated for this report, the coefficient of variation measures certain nonsampling errors but does not measure any systematic biases in the data. Bias is the difference, averaged over all possible samples of the same size and design, between the estimates and the true value being estimated. Nonsampling errors can be attributed to many sources: (1) inability to obtain information about all cases in the sample, (2) response errors, (3) definitional difficulties, (4) differences in the interpretation of questions, (5) mistakes in recording or coding the data obtained, and (6) other errors of collection, response, coverage, and estimation of missing data. These non-sampling errors also occur in complete censuses. Although no direct measures of the biases have been obtained, precautionary steps were taken in all phases of the collection, processing, and

tabulation of the data in an effort to minimize their influence. Coverage error has an effect on the accuracy of estimates for this survey to the extent that the administrative records system, which forms the basis of our survey universe frame, does not contain all legal businesses.

A major source of bias in the published estimates is due to imputing data for nonrespondents, for late reporters, and for data which fail edit. For all kinds of business combined, imputed sales amount to about 23 percent of the national sales estimates.

Table B-1. **Estimated Coefficients of Variation in Percent for Retail Sales by Kinds of Business**

[Based on sales estimates not adjusted for seasonal variations, holiday, or trading-day differences]

*See appendix A. Percent Change.

¹The ratio of the preliminary estimate for the current month over the final estimate for the previous month.²The ratio of the preliminary estimate to the final estimate for the same month one year ago.³Includes data for leased departments operated within department stores. Data for this line not included in broader kind-of-business total.⁴Includes establishments primarily selling merchandise through coin-operated vending machines, by house-to-house canvass or from mail-order.⁵The sales estimates for "total mail order", SIC 5961, are the sums of the "mail-order houses (department store merchandise)" and the "other mail-order," formerly published in the *Monthly Retail Trade Report*.⁶GAF represents stores which specialize in department store types of merchandise (see appendix A).

Note: The ranges and medians of the coefficients of variation shown above for the preliminary and final estimates and the ratio of change in sales are based on sales estimates for the six most recent data months.

¹The ratio of the preliminary estimate for the current month to the final estimate for the previous month.

²The ratio of the preliminary estimate to the final estimate for the same month one year ago.

³GAF represents stores which specialize in department store types of merchandise (see appendix A).

Note: The median coefficients of variation are based on sales estimates for the six most recent data months.

Table B-6. Estimated Coefficients of Variation in Percent for Inventories by Kinds of Business

[Based on estimates not adjusted for seasonal variations]

Note: The coefficients of variation are based on inventories estimates for the six most recent data months.

MONTHLY REVISIONS TO ESTIMATES

Each month the Census Bureau issues three sets of estimates of retail sales: advance, preliminary, and final; two estimates of retail inventories- preliminary and final- are also issued. The Bureau releases "non-final" advance and preliminary data to provide government and private data users with much demanded early measures of consumer spending. However, a necessary part of the process of issuing these early data entails the resultant issuance of minor subsequent revisions. These revisions to the monthly sales and inventories estimates occur because the advance and preliminary estimates are released prior to the collection of all data eventually used in the calculation of the final monthly retail sales and inventories estimates.

The advance sales estimates are based on early reporting of sales by a small subsample of the Bureau's retail survey panels. Because of the early reporting and the sampling variability between the subsample and the full sample, the advance estimates will differ from the subsequent estimates for the same month. There are also

differences between the preliminary and final sales estimates because of the difference in the samples as described in the section, "Use of the Rotating Sample and Composite Estimate Procedures" and such nonsampling errors as indicated in Appendix B, "Reliability of Data." The inventories estimates are also developed from rotating samples of respondents, i.e., most respondents are canvassed at 3 month intervals. Therefore, the differences between the preliminary and final inventories estimates for the same month are due to sampling and nonsampling errors.

For total retail sales, the range of the difference between the last 12 advance and final estimates for the same months was from -0.2 percent to +1.4 percent, with a median of +0.2 percent. The range of difference between preliminary and final estimates was from -0.2 percent to +0.2 percent, with a median of 0.0 percent. The preliminary-to-final difference for total retail inventories over the last 12 months ranged from -0.4 percent to +0.4 percent, with a median of 0.0 percent.

Appendix C.

Adjustment Factors for Seasonal and Other Variations

Seasonal factors for adjusting data in this publication have been derived by the use of the X-11 ARIMA program developed by Statistics Canada. The program produces factors by using the method described in the *X-11 Variant of the Census Method II Seasonal Adjustment Program*, U.S. Bureau of the Census Technical Paper No. 15, Revised 1967. The forecasting options were not used as input to the X-11 ARIMA program. This adjustment program develops more accurate computations and diagnostics than the previously used program. Trading-day factors for adjusting retail sales estimates were also derived from the X-11 program.

Adjustment of estimates is an approximation based on current and past experiences. Therefore, the adjustments could become less precise if current competitive pressures, changes in consumer buying patterns during holiday periods, and other elements introduce significant changes in seasonal, trading-day, and holiday patterns.

A description of trading-day adjustment factors may be found in *Estimating Trading-Day Variation in Monthly Economic Time Series*, Bureau of the Census Technical Paper No. 12, 1965. Holiday adjustment factors were developed by a method similar to that described in *Seasonal Adjustment on Electronic Computers*, pp. 356-359, Organization

for Economic Cooperation and Development, Paris, 1961. Additional details concerning the adjustment factors may be obtained from the Chief, Services Division, Bureau of the Census, Washington, DC 20233.

Concurrent seasonal adjustment uses all available unadjusted estimates (including the latest preliminary and advance estimates) as input to the X-11 program. When unadjusted advance, preliminary, and final estimates become available, all estimates will be used as input to the X-11 program and new factors will be applied to the advance, (one month after the preliminary) preliminary, and final (one month before the preliminary) estimates and to the previous year estimates that correspond to the advance and preliminary months.

Tables C-1 and C-2 present, by kind of business, the combined seasonal, trading-day, and holiday adjustment factors that are used to adjust inventory and sales estimates. For kinds of business whose last observation is an advance estimate, two months of projected factors are shown. For all other kinds of business, three months of projected factors are shown. These projected factors are estimates of the factors that will be used to derive adjusted estimates.

Note: Data are adjusted for seasonal variations. Each month, new factors are developed using the latest estimates and applied to the unadjusted Preliminary and Final (one month before the Preliminary estimate) estimates and to the estimates of the previous year that correspond to the Preliminary month. Adjustment factors are not included in this table for kinds of business that are not published separately. Adjusted inventory data are obtained by dividing the unadjusted data by the adjustment factors shown above for corresponding kinds of business. Adjusted data for the summary trade totals are obtained by summarizing the adjusted data for the individual kinds of business. The options used to derive factors for each kind of business were selected during the last benchmarking operation and will not be subject to modification until the next benchmarking operation. These options are available upon request.

Note: Data are adjusted for seasonal variations, holiday, and trading-day differences. Each month, new factors are developed using the latest estimates and applied to the unadjusted Advance (the month after the Preliminary estimate, but not available in this publication), Preliminary, and Final (the month before the Preliminary estimate) estimates and to the estimates of the previous year that correspond to the Advance and Preliminary months. The sales adjustment factors are not included in this table for those kinds of business for which adjusted data are not published separately. Adjusted sales data are obtained by dividing the unadjusted data by the adjustment factors shown above for corresponding kinds of business. Adjusted data for the summary trade totals are obtained by summarizing the adjusted data for the individual kinds of business. The options used to derive factors for each kind of business were selected during the last benchmarking operation and will not be subject to modification until the next benchmarking operation. These options are available upon request.

Appendix D.

Metropolitan Areas Included in This Report

(Areas were defined by the Office of Management and Budget as of November 19, 1986)¹

ANAHEIM-SANTA ANA, CA PMSA Coextensive with Orange County, CA.

ATLANTA, GA MSA Barrow, Butts, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties, GA.

BALTIMORE, MD MSA Baltimore City; Anne Arundel, Baltimore, Carroll, Harford, Howard, and Queen Anne's Counties, MD.

BOSTON-LAWRENCE-SALEM-LOWELL-BROCKTON, MA NECMA Essex, Middlesex, Norfolk, Plymouth, and Suffolk Counties, MA.

CHICAGO-GARY-LAKE COUNTY, IL-IN-WI CMSA Chicago, IL PMSA; Grundy, Kane, Kendall, Lake, and Will Counties, IL; Lake and Porter Counties, IN; Kenosha County, WI.

CHICAGO, IL PMSA Cook, DuPage, and McHenry Counties, IL.

CINCINNATI-HAMILTON, OH-KY-IN CMSA Butler, Clermont, Hamilton, and Warren Counties, OH; Boone, Campbell, and Kenton Counties, KY; Dearborn County, IN.

CLEVELAND-AKRON-LORAIN, OH CMSA Cleveland, OH PMSA; Lorain, Portage, and Summit Counties, OH.

CLEVELAND, OH PMSA Cuyahoga, Geauga, Lake, and Medina Counties, OH.

DALLAS-FORT WORTH, TX CMSA Collin, Dallas, Denton, Ellis, Johnson, Kaufman, Parker, Rockwall, and Tarrant Counties, TX.

DENVER-BOULDER, CO CMSA Adams, Arapahoe, Boulder, Denver, Douglas, and Jefferson Counties, CO.

DETROIT-ANN ARBOR, MI CMSA Detroit, MI PMSA; Washtenaw County, MI.

DETROIT, MI PMSA Lapeer, Livingston, Macomb, Monroe, Oakland, St. Clair, and Wayne Counties, MI.

HOUSTON-GALVESTON-BRAZORIA, TX CMSA Houston, TX PMSA; Brazoria and Galveston Counties, TX.

HOUSTON, TX PMSA Fort Bend, Harris, Liberty, Montgomery, and Waller Counties, TX.

KANSAS CITY, MO-KS MSA Cass, Clay, Jackson, Lafayette, Platte, and Ray Counties, MO; Johnson, Leavenworth, Miami, and Wyandotte Counties, KS.

LOS ANGELES-ANAHEIM-RIVERSIDE, CA CMSA Anaheim Santa Ana, CA PMSA; Los Angeles-Long Beach, CA PMSA; Riverside, San Bernardino, and Ventura Counties, CA.

LOS ANGELES-LONG BEACH, CA PMSA Coextensive with Los Angeles County, CA.

MIAMI-FORT LAUDERDALE, FL CMSA Miami-Hialeah, FL PMSA; Broward County, FL.

MIAMI-HIALEAH, FL PMSA Coextensive with Dade County, FL.

MILWAUKEE-RACINE, WI CMSA Milwaukee, WI PMSA; Racine County, WI.

MILWAUKEE, WI PMSA Milwaukee, Ozaukee, Washington, and Waukesha Counties, WI.

MINNEAPOLIS-ST. PAUL, MN-WI MSA Anoka, Carver, Chicago, Dakota, Hennepin, Isanti, Ramsey, Scott, Washington, and Wright Counties, MN; St. Croix County, WI.

NASSAU-SUFFOLK, NY PMSA Nassau and Suffolk Counties, NY.

NEW YORK-NORTHERN NEW JERSEY-LONG ISLAND, NY-NJ-CT CMSA Nassau-Suffolk, NY PMSA; New York, NY PMSA; Newark, NJ PMSA; Orange County, NY; Bergen, Hudson, Hunterdon, Middlesex, Monmouth, Ocean, Passaic, and Somerset Counties, NJ; Fairfield and Litchfield Counties, CT.

NEW YORK, NY PMSA Bronx, Kings, New York, Putnam, Queens, Richmond, Rockland, and Westchester Counties, NY.

NEWARK, NJ PMSA Essex, Morris, Sussex, and Union Counties, NJ.

OAKLAND, CA PMSA Alameda and Contra Costa Counties, CA.

¹CMSA—Consolidated Metropolitan Statistical Area; MSA—Metropolitan Statistical Area; PMSA—Primary Metropolitan Statistical Area; NECMA—New England County Metropolitan Area.

PHILADELPHIA-WILMINGTON-TRENTON, PA-NJ-DE-MD

CMSA Philadelphia, PA-NJ PMSA; Cumberland, Mercer, and Salem Counties, NJ; New Castle County, DE; Cecil County, MD.

PHILADELPHIA, PA-NJ PMSA Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, PA; Burlington, Camden, and Gloucester Counties, NJ

PHOENIX, AZ MSA Coextensive with Maricopa County, AZ.

PITTSBURGH-BEAVER VALLEY, PA CMSA Pittsburgh, PA PMSA; Beaver County, PA.

PITTSBURGH, PA PMSA Allegheny, Fayette, Washington, and Westmoreland Counties PA.

ST. LOUIS, MO-IL MSA St. Louis City; Franklin, Jefferson, St. Charles, and St. Louis Counties, MO; Clinton, Jersey, Madison, Monroe, and St. Clair Counties, IL.

SAN DIEGO, CA MSA Coextensive with San Diego County, CA.

SAN FRANCISCO-OAKLAND-SAN JOSE, CA CMSA

Oakland, CA PMSA; San Francisco, CA PMSA; Napa, Santa Clara, Santa Cruz, Solano, and Sonoma Counties, CA.

SAN FRANCISCO, CA PMSA Marin, San Francisco, and San Mateo Counties, CA.

SEATTLE-TACOMA, WA CMSA King, Pierce, and Snohomish Counties, WA.

TAMPA-ST. PETERSBURG-CLEARWATER, FL MSA Hernando, Hillsborough, Pasco, and Pinellas Counties, FL.

WASHINGTON, DC-MD-VA MSA District of Columbia; Calvert, Charles, Frederick, Montgomery, and Prince George's Counties, MD; Alexandria, Fairfax, Falls Church, Manassas, and Manassas Park cities; Arlington, Fairfax, Loudoun, Prince William, and Stafford Counties, VA.

Appendix F.

Kind-of-Business Classifications

GENERAL DESCRIPTION

Retail trade SIC Major Groups 52-59, includes establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of goods.

The kinds of business shown in this report parallel broad classifications defined in the 1987 edition of the Standard Industrial Classification (SIC) manual. Descriptions of each kind of business follow. Data for some kinds of business are not shown separately but are included in the major group of other totals.

DURABLE GOODS

Building Materials, Hardware, Garden Supply, and Mobile Home Dealers (SIC Major Group 52). This major group includes retail establishments primarily engaged in selling lumber and other building materials; paint, glass, and wallpaper; hardware; nursery stock; lawn and garden supplies; and mobile homes. It includes lumber and other building materials dealers and paint, glass, and wallpaper stores selling to the general public, even if sales to contractors account for a larger proportion of total sales. These establishments are known as “retail” in the trade. Establishments primarily selling these products but not selling to the general public are classified in wholesale trade.

Lumber and Other Building Materials Dealers (SIC 521).¹ Establishments engaged in selling primarily lumber, or lumber and a general line of building materials, to the general public. The lumber which they sell may include rough and dressed lumber, flooring, molding, doors, sashes, frames, and other millwork. The building materials may include roofing, siding, shingles, wallboard, paint, brick, tile, cement, sand, gravel, and other building materials and supplies. Hardware is often an important line of retail lumber and building materials dealers. Establishments known as “home centers” are included here.

Paint, Glass, and Wallpaper Stores (SIC 523).¹ Establishments engaged in selling primarily paint, glass, and wallpaper, or any combination of these lines, to the general public.

¹Data for this kind of business are not shown separately but are included in the larger group totals.

Hardware Stores (SIC 525). Establishments primarily selling a number of basic hardware lines such as tools, builders' hardware, paint and glass, housewares and household appliances, cutlery, and roofing materials, no one of which accounts for 50 percent or more of the sales of the establishments.

Retail Nurseries, Lawn and Garden Supply Stores (SIC 526).¹ Establishments primarily engaged in selling trees, shrubs, other plants, seeds, bulbs, mulches, soil conditioners, fertilizers, pesticides, garden tools, and other garden supplies to the general public. These establishments primarily sell products purchased from others, but may sell some plants which they grow themselves.

Mobile Home Dealers (SIC 527).¹ Establishments primarily engaged in the retail sale of new and used mobile homes, including parts and accessories.

Automotive Dealers (SIC Major Group 55, ex. 554)

This major group includes retail dealers selling new and used automobiles, boats, recreational trailers, and motorcycles; and those selling new automobile parts and accessories. Automobile repair shops maintained by the establishments engaged in the sale of new automobiles are also included.

Motor Vehicle Dealers (Franchised)—New and Used (SIC 551). Establishments primarily engaged in the sale of new automobiles or new and used foreign or domestic automobiles. These establishments frequently maintain repair departments and used car lots and carry stocks of replacement parts, tires, batteries, and automotive accessories. Used car lots and repair departments operated by franchised new passenger car dealers are not considered separate locations.

Motor Vehicle Dealers (Nonfranchised)—Used Cars Only (SIC 552).¹ Establishments primarily selling used cars and not holding a franchise for the sale of new cars.

Auto and Home Supply Stores (SIC 553). Establishments primarily engaged in the retail sale of automobile tires, batteries, and other automobile parts and accessories. These establishments frequently sell additional lines of merchandise such as household appliances, radios and television sets, sporting goods, housewares, and hardware.

Boat Dealers (SIC 555).¹ Establishments primarily engaged in the retail sale of new and used motorboats and other watercraft, including parts, accessories, marine supplies, and outboard motors.

Recreational Vehicle Dealers (SIC 556).¹ Establishments primarily engaged in the retail sale of new and used recreational trailers, campers (pickup coaches), and other trailers for passenger automobiles, and motor homes, including parts and accessories.

Motorcycle Dealers (SIC 557).¹ Establishments primarily engaged in the retail sale of new and used motorcycles and motor scooters, including parts and accessories.

Automotive Dealers, Not Elsewhere Classified (SIC 559).¹ Establishments primarily engaged in the retail sale of new and used automotive vehicles, such as snowmobiles, dunebuggies, go-carts, aircraft, utility trailers, and new automotive equipment and supplies, not elsewhere classified.

Furniture, Home Furnishings, and Equipment Stores (SIC Major Group 57)

This major group includes retail stores selling goods used for furnishing the home, such as furniture, floor coverings, draperies, glass and chinaware, domestic stoves, refrigerators, and other household electrical and gas appliances.

Furniture Stores (SIC 5712). Establishments primarily selling household furniture, beds, mattresses, springs, and other sleep equipment. Also included in this classification are establishments selling household appliances, phonographs, radio and TV sets, and floor coverings, provided the receipts from sales of furniture and sleep equipment exceed those from sales of other merchandise.

Floor Coverings Stores (SIC 5713). Establishments primarily engaged in the retail sale of floor coverings and related products.

Drapery, Curtain, and Upholstery Stores (SIC 5714).¹ Establishments primarily selling draperies, curtains, slipcovers, and upholstery materials. Establishments primarily selling custom made draperies and slipcovers for household use also are included.

Miscellaneous Home Furnishing Stores (SIC 5719).¹ Establishments primarily engaged in the retail sale of miscellaneous home furnishings, such as china, glassware, and metalware for kitchen and table use, bedding and linen, brooms, brushes, lamps and shades, mirrors and pictures, venetian blinds, window shades, and fireplace accessories.

Household Appliance Stores (SIC 5722). Establishments primarily engaged in the retail sale of electric and gas refrigerators, stoves, and other household appliances, such as electric irons, percolators, hot plates, and vacuum cleaners. Many such stores also sell radio and television sets. Retail stores operated by public utility companies and primarily engaged in the sale of electric and gas appliances for household use are classified here.

Radio, Television, and Electronics Stores (SIC 5731). Establishments primarily engaged in the retail sale and installation of radios, television sets, record players, high fidelity (hi-fi), sound reproducing equipment and home computers. Such establishments also may sell additional lines, such as household appliances, musical instruments, or records.

Computer and Computer Software Stores (SIC 5734). Establishments primarily engaged in the retail sale of computers, computer peripheral equipment, and software.

Music Stores (SIC 5735 + 5736).¹ Establishments primarily engaged in the retail sale of musical instruments, phonograph records and albums, sheet music, and similar musical supplies.

Miscellaneous Durable Goods Stores (SIC Major Group 59 part)

This includes all retail durable goods stores not elsewhere classified.

Used Merchandise Stores (SIC 593).² This industry includes stores primarily engaged in the retail sale of used merchandise, antiques, and secondhand goods such as clothing and shoes; furniture; books and rare manuscripts; musical instruments; office furniture, phonographs and phonograph records; and store fixtures and equipment. This industry also includes pawnshops.

Sporting Goods Stores and Bicycle Shops (SIC 5941). Establishments primarily selling a general or a specialized line of sporting goods and equipment for hunting, camping, fishing, skiing, riding, tennis, golf, and other sports; bicycles, bicycle parts and accessories; and gymnasium and playground equipment.

Book Stores (SIC 5942). Establishments primarily selling new books and periodicals. Stationery and related items may also be sold.

Jewelry Stores (SIC 5944). Establishments primarily engaged in the retail sale of any combination of the lines of jewelry, such as diamonds and other precious stones; rings, bracelets, and brooches; sterling and plated silverware; and watches and clocks.

²Data for this kind of business are not shown separately but are included in the durable goods stores total.

Hobby, Toy, and Game Shops (SIC 5945).³ Establishments primarily engaged in the retail sale of toys, games, and hobby kits and supplies.

Camera and Photographic Supply Stores (SIC 5946).³ Establishments primarily engaged in the retail sale of cameras, film, and other photographic supplies and equipment. Excluded are establishments primarily engaged in finishing films.

Gift, Novelty, and Souvenir Shops (SIC 5947).³ Establishments primarily engaged in the retail sale of combined lines of gifts and novelty merchandise, souvenirs, and miscellaneous small art goods such as greeting cards and holiday decorations.

Luggage and Leather Goods Stores (SIC 5948).³ Establishments primarily engaged in the retail sale of luggage, trunks, and leather goods.

Optical Goods Stores (SIC 5995).² Establishments primarily engaged in the retail sale of eyeglasses and related optical goods. Excluded are establishments whose receipts are primarily from examining eyes and prescribing eyeglasses or contact lenses.

Miscellaneous Retail Stores Not Elsewhere Classified (SIC 5999).² Establishments primarily engaged in the retail sale of specialized lines of merchandise such as collectors' items and supplies, artists' supplies, orthopedic and artificial limbs, drafting materials, typewriters, telephones, pets, religious goods, hearing aids, rubber stamps, monuments and tombstones, and other merchandise not elsewhere classified.

NONDURABLE GOODS

General Merchandise Group Stores (SIC Major Group 53)

This major group includes retail stores which sell a number of lines of merchandise, such as dry goods, apparel and accessories, furniture and home furnishings, small wares, hardware, and food. The stores included in this group are known as department stores, variety stores, general merchandise stores, general stores, etc.

Department Stores (SIC 531). Establishments normally employing 50 people or more, having sales of apparel and soft goods combined amounting to 20 percent or more of total sales, and selling each of the following lines of merchandise:

1. Furniture, home furnishings, appliances, and radio and TV sets.
2. A general line of apparel for the family.
3. Household linens and dry goods.

To qualify as a department store, sales of each of the lines listed above must be less than 80 percent of total store sales. An establishment with total sales of \$10 million or more is classified as a department store even if sales of one of the merchandise lines listed above exceed the maximum percent of total sales, provided that the combined sales of the other two groups are \$1 million or more. Department store sales have been separately presented for the following classifications:

Department stores (incl. leased depts.), and
Department stores (excl. leased depts.).

Department stores (incl. leased depts.) are also sub-categorized as shown below:

Conventional Department Stores (SIC 531 part). Establishments which satisfy the criteria of a department store and:

1. Usually provide check-out service and customer assistance (salespersons) within each department.
2. May have a catalog order desk.
3. Are not affiliated with a company which operates similar establishments on a national basis.

These stores often sell:

1. Soft goods and hard goods which are primarily nationally advertised brands.
2. Appliances which are serviced by another company.
3. Limited lines of merchandise through seasonal or special catalogs.

Discount or Mass Merchandising Department Stores (SIC 531 part). Establishments which satisfy the criteria of a department store and usually:

1. Convey the image of a high-volume, fast turnover outlet selling a variety of merchandise for less than conventional prices.
2. Provide centralized check-out service.
3. Do not provide customer assistance within store departments. Merchandise is normally sold through self-service with minimal assistance provided in any department.
4. Do not have a catalog order desk.

³Data for this kind of business are not shown separately but are included in the larger group: miscellaneous shopping goods stores (594).

These stores often sell:

1. Soft goods which are usually their own corporate brands or are unbranded.
2. Hard goods which are primarily nationally advertised brands.
3. Appliances which are serviced by another company.

National Chain Department Stores (SIC 531 part). Establishments which satisfy the criteria of a department store and:

1. Usually provide check-out service and customer assistance (salespersons) within each department.
2. May have a catalog order desk.
3. Are affiliated with a company which operates similar establishments on a national basis.

These stores often sell:

1. Soft goods and hard goods which are their own corporate brands or are unbranded.
2. Appliances which are serviced by their own company.

Variety Stores (SIC 533). Establishments primarily engaged in the retail sale of a variety of merchandise in the low and popular price ranges. Sales usually are made on a cash-and-carry basis with the open selling method of display and customer selection of merchandise. These stores generally do not carry a complete line of merchandise, are not departmentalized, do not carry their own charge service, and do not deliver merchandise.

Miscellaneous General Merchandise Stores (SIC 539). Establishments primarily engaged in the retail sale of a general line of apparel, dry goods, hardware, homewares or home furnishings, groceries, and other lines in limited amounts. Stores selling commodities covered in the definition for department stores, but normally having less than 50 employees, and stores usually known as catalog showrooms, country general stores, or warehouse clubs are included here. Also included in this classification are establishments whose sales of apparel or of furniture and home furnishings exceed half of their total sales providing that sales of the smaller of the two lines in combination with dry goods and household linens account for 20 percent or more of total sales.

Food Stores (SIC Major Group 54)

This major group includes retail stores primarily engaged in selling food for home preparation and consumption.

Grocery Stores (SIC 541). Establishments primarily selling (1) a wide variety of canned or frozen foods, such as vegetables, fruits, and soups; (2) dry groceries, either packaged or in bulk, such as tea, coffee, cocoa, dried fruits, spices, sugar, flour, and crackers; and (3) other processed foods and nonedible grocery items. In addition, these establishments often sell smoked and prepared meats, fresh fish and poultry, fresh vegetables and fruits, and fresh or frozen meats.

Establishments commonly known as supermarkets, food stores, convenience stores, and delicatessens are included in this classification if receipts from sales of groceries and food items for off-premise preparation and consumption are 50 percent or more of total sales.

Meat and Fish (Seafood) Markets, Including Freezer Provisioners (SIC 542). Establishments primarily engaged in the retail sale of fresh, frozen, or cured meats, fish, shellfish, and other seafood. Frequently these establishments also sell poultry, dairy products, eggs, some groceries, and items commonly used in preparing seafood or consumed with seafood.

Fruit Stores and Vegetable Markets (SIC 543).¹ Establishments primarily selling fresh fruits and fresh vegetables. These establishments frequently carry a limited line of grocery items. Roadside stands of farmers selling only their own produce are not included.

Candy, Nut, and Confectionery Stores (SIC 544).¹ Establishments primarily selling candy, nuts, sweetmeats, and other confections. A soda fountain or lunch counter is frequently operated in these stores. Also included are candy and popcorn stands located in motion picture theaters.

Dairy Products Stores (SIC 545).¹ Establishments primarily engaged in the retail sale of dairy products, such as milk, cream, butter, cheese, and related products, to over-the-counter customers.

Retail Bakeries (SIC 546). Establishments primarily engaged in the over-the-counter retail sale of bakery products such as bread, cakes, pies, or cookies, all or some of which may be baked on the premises.

Other Miscellaneous Food Stores (SIC 549).¹ Establishments primarily engaged in the retail sale of specialized foods, not elsewhere classified, such as eggs and poultry, health foods, spices, herbs, coffee, and tea. The poultry stores may sell live poultry, slaughter and clean poultry for their own account and sell dressed fowls, or sell fowl cleaned and dressed by others.

Gasoline Service Stations (SIC 554)

Establishments primarily selling gasoline and automotive lubricants. Usually these establishments also sell tires, batteries, and accessories, and perform minor repair work

and services. Establishments called garages but deriving more than half of their receipts from the sale of gasoline and automotive lubricants and establishments known as truck stops which are primarily engaged in selling diesel fuel to truckers are also included. Convenience food stores deriving more than 50 percent of their sales from the sale of gasoline are classified as gasoline service stations.

Apparel and Accessory Stores (SIC Major Group 56)

Establishments in this major group are primarily engaged in selling clothing of all kinds and related articles for personal wear and adornment.

Men's and Boys' Clothing and Furnishings Stores (SIC 561). Establishments primarily selling men's and boys' ready-to-wear clothing and furnishings.

Women's Ready-to-Wear Stores (SIC 562). Establishments primarily selling women's and girls' ready-to-wear apparel.

Women's Accessory and Specialty Stores (SIC 563).¹ Establishments primarily selling a specialized line of women's and girls' apparel, such as furs, sportswear, beachwear, blouses, hosiery, millinery, foundation garments, lingerie, robes, and other intimate wear.

Children's and Infants' Wear Stores (SIC 564).¹ Establishments primarily engaged in the retail sale of children's and infants' clothing, furnishings, and accessories. Such establishments may specialize in either children's or infants' wear or they may sell a combination of children's and infants' wear.

Family Clothing Stores (SIC 565). Establishments primarily selling clothing, furnishings, and accessories for men, women, and children, without specializing in any one line.

Shoe Stores (SIC 566). Establishments primarily engaged in the retail sale of any one line, or a combination of the lines, of men's, women's, and children's footwear. These establishments frequently carry accessory lines such as hosiery, gloves, and handbags.

Miscellaneous Apparel and Accessory Stores (SIC 569).¹ Establishments primarily engaged in the retail sale of specialized lines of apparel and accessories not elsewhere classified, such as uniforms, bathing suits, raincoats, riding apparel, sports apparel, umbrellas, wigs, and toupees. This industry also includes custom tailors primarily engaged in making and selling men's and women's clothing (except fur apparel SIC 568) to individual order.

Eating and Drinking Places (SIC Major Group 58)

Establishments in this major group are primarily engaged in selling prepared foods and drinks for consumption on or near the premises and lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption.

Restaurants, Lunchrooms, Cafeterias, and Contract Feeding (SIC 5812 part).

*Restaurants and Lunchrooms.*⁴ Establishments engaged in serving prepared food and beverages selected by the patron from a full menu. Waiter or waitress service is provided and the establishment has seating facilities for at least 15 patrons. These establishments often serve alcoholic beverages, but receipts from the sale of alcoholic beverages may not exceed the receipts from prepared food.

*Cafeterias.*⁴ Establishments engaged in serving prepared food and beverages primarily through the use of a cafeteria line where customers serve themselves from displayed selections. Some limited waiter or waitress service may be provided. Table and/or booth seating facilities are usually provided.

*Contract Feeding.*⁴ Establishments primarily engaged in providing food service under contract to another company; hospital; or governmental, penal, or educational institution. The facilities and personnel of these establishments may be provided by the contracting company, institutions, etc., however, the management is always supplied by the contractor.

Social Caterers (SIC 5812 part).⁵ Establishments primarily engaged in serving prepared food and beverages for weddings, banquets, etc., on the premises or elsewhere. Such establishments also may arrange for some entertainment but this should be a minor part of the business.

Refreshment Places, Ice Cream, and Frozen Custard Stands, (SIC 5812 part).

*Refreshment Places.*⁶ Establishments primarily selling limited lines of refreshments and prepared food items. Included in this group are establishments which prepare refreshment items such as pizza, barbecued chicken, and hamburgers for consumption either on or near the premises or for take-home consumption.

⁴Data for this kind of business are not shown separately but are included in the larger group: Restaurants, Lunchrooms, Cafeterias.

⁵Data for this kind of business are not shown separately but are included in the larger group: Eating Places (SIC 5812).

⁶Data for this kind of business are not shown separately but are included in the larger group: Refreshment Places (SIC 5812 pt.).

*Ice Cream and Frozen Custard Stands.*⁶ Establishments primarily engaged in selling ice cream, frozen custard, or other frozen ices for consumption either on or near the premises. Take-home packages also may be provided for ice cream sold in bulk.

Drinking Places (SIC 5813). Establishments primarily engaged in the retail sale of drinks such as beer, ale, wine, liquor, and other alcoholic beverages for consumption on the premises. Prepared foods are frequently sold at these establishments, but receipts from the sale of prepared foods may not exceed receipts from sales of alcoholic beverages.

Drug Stores and Proprietary Stores (SIC 591)

Establishments engaged in the retail sale of prescription drugs and patent medicines and which may carry a number of related lines such as cosmetics, toiletries, tobacco, and novelty merchandise. Included are drug stores which also have a soda fountain or lunch counter. These stores are included on the basis of their usual trade designation rather than on the more strict interpretation of commodities handled.

Liquor Stores (SIC 592)

Establishments primarily selling packaged alcoholic beverages, such as ale, beer, wine, and whiskey, for consumption off the premises. Liquor stores operated by States, counties, and municipalities are included.

Miscellaneous Nondurable Goods Stores (SIC Major Group 59, part)

This includes all retail nondurable goods stores not elsewhere classified.

Miscellaneous Shopping Goods Stores (SIC 594)

Establishments engaged in the retail sale of one or more lines of merchandise similar to that found in department stores.

Stationery Stores (SIC 5943).³ Establishments primarily engaged in the retail sale of stationery, such as paper and paper products (including printing and engraving), post cards, novelties, and school and office supplies (excluding office furniture and machines).

Sewing, Needlework, and Piece Goods Stores (SIC 5949).³ Establishments primarily engaged in the retail sale of piece goods, notions, sewing and knitting supplies, fabrics, patterns, and other needlework accessories.

Mail-Order Houses (Department Store Merchandise) (SIC 5961 part). Establishments with normally 50 or more employees primarily engaged in the retail sale by catalog and mail order of a general line of merchandise similar to that sold by department stores.

Other Mail-Order Houses (SIC 5961 part). Establishments primarily engaged in the retail sale of a specialized or limited line of merchandise such as food, automotive merchandise, apparel, books, stationery, etc., by catalog and mail order.

Automatic Merchandising Machine Operators (SIC 5962).⁷ Establishments primarily engaged in the retail sale of products by means of automatic merchandising units (vending machines) which are generally located on the premises of other businesses. Those products include candy, nut, and confectionery; milk and ice cream; other beverages; and tobacco products.

Direct Selling Establishments (SIC 5963).⁷ Establishments primarily selling merchandise by house-to-house canvass, by party plan, by telephone, or from a truck. The merchandise includes building materials, hardware, and garden supplies; general merchandise, milk; other foods; apparel and accessories; furniture, home furnishings, and equipment; mobile food service; and books and stationery.

Fuel Oil Dealers (SIC 5983).⁸ Establishments primarily engaged in the retail sale of fuel oil.

Liquefied Petroleum Gas Dealers (SIC 5984).⁸ Establishments primarily engaged in the retail sale of liquefied petroleum (LP) gas (bottled gas or in bulk.)

Fuel Dealers, Not Elsewhere Classified (SIC 5989).⁸ Establishments primarily engaged in the retail sale of coal, coke, charcoal, wood, or any combination of these lines.

Florists (SIC 5992).⁸ Establishments primarily engaged in the retail sale of cut flowers and growing plants. Greenhouses and nurseries are included if receipts are primarily from the sale of products not grown on the premises.

Cigar Stores and Stands (SIC 5993).⁸ Establishments primarily engaged in the retail sale of cigars, cigarettes, tobacco, and smokers' supplies. Many of the establishments included in this classification are operated as concessions in places of amusement, railway stations, airports, and other public places.

News Dealers and Newsstands (SIC 5994).⁸ Establishments primarily engaged in the retail sale of newspapers, magazines, and other periodicals.

⁷Data for this kind of business are not shown separately but are included in the larger group: Nonstore Retailers (SIC 596).

⁸Data for this kind of business are not shown separately but are included in the nondurable goods stores total.

ELECTRONIC SOURCES FOR RETAIL TRADE DATA

Recorded Messages

If you have a touch tone phone, you can obtain monthly sales estimates at the United States level by calling 301-457-1089. Estimates are available for:

- Advance estimates of sales for the most recently completed month.
- Preliminary estimates for the month prior to the advance month.
- Final estimates for the month before the preliminary month.

The estimates are usually released at 8:30 a.m. on the 9th working day after the end of the data month. If the 9th working day is a Monday, the estimates are released on the 10th working day.

Fastfax

You can obtain data contained in the tables 1, 8, and 9 by using the Census Bureau's FASTFAX system. To order, call 1-900-555-2FAX from anywhere in the North American dialing area. Follow the recorded instructions and the item

will be sent to the fax number you designate. Order document #1030 to receive the tables above.

Internet

If you have access to INTERNET, you can obtain data contained in tables 1, 8, and 9. To get the Census home page:

- Using the Gopher, from the Internet prompt, type:
`gopher gopher.census.gov`
- Using FTP, from the Internet prompt, type:
`ftp.census.gov`
- Using the World Wide Web, type:
`http://www.census.gov`

From the Census home page click on
Current Economic Indicators, Retail (About
Businesses), then Monthly Retail Trade Survey.

The specific location of the files is:

`ftp://ftp.census.gov/pub/svsd/retlmon/download`

File names for current year data are RT [yyymm].txt.

File names for historical data are Sales [yy].txt.
